

KM 604

Clamshell Bucket with Horizontal Hydraulic Cylinder

The KM 604 is the ideal solution for light weight loader cranes in daily routine work – robust, effective, budget priced.

- **Maximum loading height** is achieved through the compact design with the horizontal hydraulic cylinder.
- **Long life** is ensured through the use of 500 HB steel in the manufacture of the cutting edges and a generously dimensioned bearing system.
- **Synchronized opening and closing** through sturdy compensation bar.
- **Bolt-on digging teeth** are delivered with each clamshell bucket.
- **Excellent digging characteristics** are a result of high closing forces (20 kN at 26 MPa operating pressure).
